

TOSHIBA ONE

Your technology partner of choice

Managed Technology Services

Proactive

An IT Partner, Not Provider

We understand why your critical business services are so important to your daily operations. This is why we spend so much time aligning our technology to support your initiatives. Building a program that relies on 24x7x365 network monitoring coupled with an aggressive preventative maintenance component ensures optimum uptime for your business.

One of the major challenges in maintaining a computer network is trying to predict what will fail and when. With our Down to Business Services solution, we can prevent many network failures from ever happening. By combining regular and comprehensive preventative maintenance and robust real-time monitoring of your critical network and desktop devices, we ensure the reliability and stability of your IT assets.

This solution is so effective that our customers see almost immediate results. A regularly maintained network means fewer failures, yielding higher productivity and savings on support costs for you. At the same time, your exposure to security risks is dramatically lessened, and frustration from unstable IT resources almost vanishes. We allow our customers to focus on their core business functions by taking the worry out of owning a computer network.

Advantages:

- > Increased productivity
- > Reduced business impact from ICT failures
- > Reduced network downtime through proactive maintenance

Common business pain points?

- > Network neglected?
- > Downtime impact?
- > Distracted employees?

TOSHIBA

**TOGETHER
INFORMATION**

DEVICE LIFE CYCLE MANAGEMENT

- > **24x7 Advanced Performance Monitoring** ensures all of the critical network devices that comprise your business network are healthy and functioning reliably and optimally.
- > **Scheduled Preventative Maintenance** ensures that your servers, PCs and other vital network devices function optimally. This improves reliability and security.
- > **Quarterly Network Health Review** dedicates time to review reports and issues that are important to the ongoing performance of your network. We translate technology into business terms for you.
- > **Security Management** uses properly designed and implemented Anti-Virus and Anti-Spam solutions to keep your business protected.
- > **Patch Management** ensures all of your Windows servers and PCs have the most up-to-date security and system patches, helping to optimise performance and minimise security risk.
- > **Network Operations Center:** Our NOC team is available to assist with all your support needs, delivering support remotely and actively monitoring your systems for critical failure.

“This program perfectly suits my business needs and ensures we have optimum uptime to avoid affecting our business.”

– A. Ferguson, Ipswich Family Veterinary Clinic.
