Monitor and Recover Document Production Expenses

Professional and Educational organisations providing resources to clients or end users often have a requirement to recover the associated costs. Ensuring your organisation recovers these associated expenses is achievable with Toshiba's complete cost recovery solutions.

Toshiba's solutions are tailored to suit any organisation, large or small, offering comprehensive reports that track all printing, copying and scanning activity throughout your organisation. Toshiba offers a suite of solutions that are scalable to your requirements and budget.

Benefits

Toshiba's cost recovery solution allows your organisation to integrate usage and costs associated with operating your print devices directly into your accounting or billing solution; allowing you to simply track and apportion costs back to the client or user. Users document output activities can either be tracked for billable purposes or users can employ a credit/debit arrangement for services, via a rechargeable card system.

Review and distribute costs

Toshiba's cost recovery solutions permit workers to customise the way their jobs are expensed so that they can be appropriately charged back to the client. Even in instances that involve multiple jobs for each client, document output costs may be assigned to individual jobs and charged back to the client as required.

Track scanning and faxing

Toshiba Managed services will ensure you can recover expenses associated with scanning and faxing. In addition to recovering costs, digitising and archiving job files to your network server or ERP system, or supplying to clients as a service, can result in substantial savings and also offers your organisation more office and storage space.

Monitor productivity

Toshiba's cost recovery solutions provide a simplified option for recovering client's billable costs and expenses as well as increasing your organisations productivity. The provision of comprehensive reporting tools can monitor your document output expenses as well as assist to reduce paper wastage and improve efficiency.

Management and Security

By integrating Toshiba's POS technology (Point of Sale) with our software solutions, we are able to create bespoke cost recovery solutions to meet the specific needs of your organisation.

We can provide a solution capable of creating a cashless society in your organisation with front end collection via a Toshiba Point of Sale solution which can be integrated into a cost recovery module. From implementing a cashless environment in your organisation, managing your environmental impact or helping you reclaim costs from clients, Toshiba's Cost Recovery and Management solutions have the answer.
