

TOSHIBA

Kōdo[®] APPLICATION

For HPE CONTENT MANAGER

- › Records compliance made easy
- › Scan to HPE Content Manager [CM] or Records Manager [RM] using one touch workflows
- › Gain valuable time through batch processing of jobs
- › Auto process documents such as batches of application forms with absolute simplicity
- › Virtually zero training using a tablet style interface that even remembers your last settings
- › Minimal IT support with on board processing
- › No limit on the number of users or scans
- › Industry standard document formats including PDF, PDF/A
- › Perfect for businesses with off-premise or cloud hosted infrastructure

FAST & ACCURATE

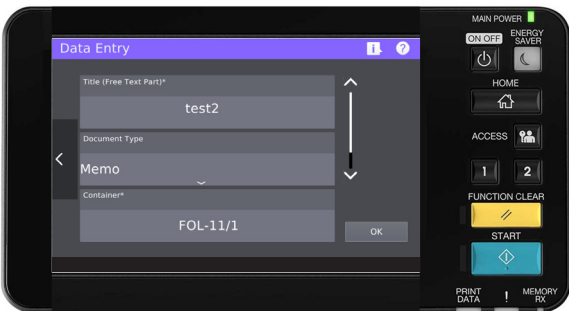

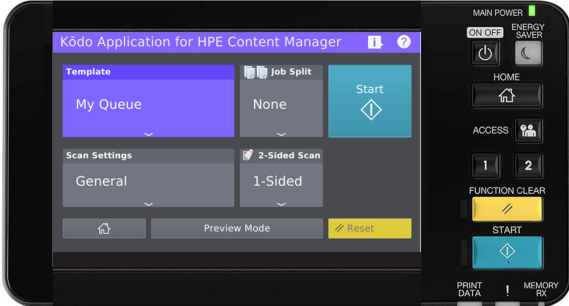

Kōdo applications are designed to make your working life easy and productive. Now you can scan documents with ease through Auto processing or to defined HPE [CM]/[RM] Record Types and Containers or to working network drives with documents automatically separated by user subfolder.

- One touch templates and scan settings
- Mixed sized original scanning supported with auto document feeder and off the glass
- Job split of large batches using nominated page interval or barcode separator page
- Ensure the integrity of your documents at the point of scan with on-screen verification, page count and editing
- Auto processing of documents such as application forms
- Definable data entry by workflow
- Better efficiency with auto notification of document submission via email that includes a URL to the record.
- Better looking documents with built-in embedded ICC colour profile, blank page removal, deskew, alignment, and outside erase functions

ENHANCED USER EXPERIENCE

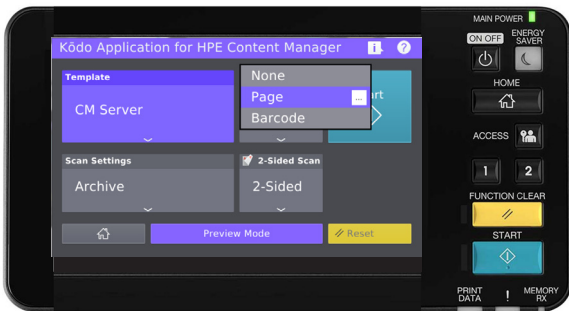

EASE OF USE

Working from the touch screen of your e-STUDIO MFP, simply interact with the user-friendly templates to apply scan settings, define the destination of the job and any user data entry.

REDUCE CYCLE TIME

Large job batches can be split by defined page e.g. every 2nd page or by barcode separator page

REQUIREMENTS

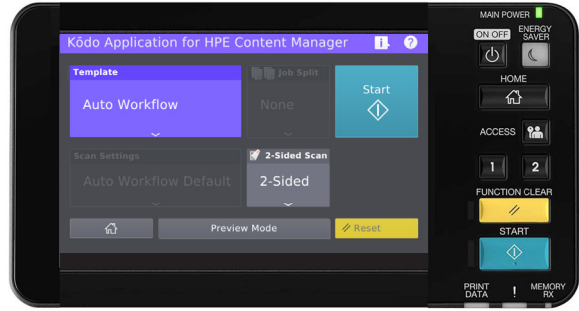

- Toshiba e-STUDIO Multi-Function Printer (MFP) with e-BRIDGE Next architecture
- HPE Records Manager RM 8.x
- HPE Content Manager CM 9.x

OPTIONS

- Embedded OCR for searchable scan file formats

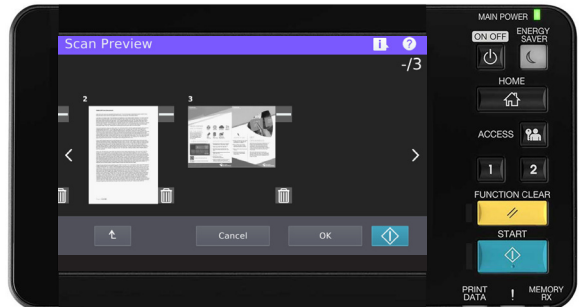

IMPROVE EFFICIENCY

Auto workflow makes scanning mixed document batches such as application forms a breeze by identifying a unique barcode or QR code on the document it automatically switches between destination and scan settings.

IMPROVE ACCURACY

Simple scan verification at the panel with document count and thumbnail preview. Pages can be added or deleted.
