

Get your Toshiba PhD

OVERVIEW

Toshiba is renowned for helping customers reduce printing costs and improve their business productivity. A **Print health and Digitisation review (PhD)** is the ideal way to start.

We provide a detailed assessment highlighting reduced printing costs, enhanced functionality and digitisation to save money, improve efficiency, accuracy and sustainability. We call this **Toshiba PhD**.

KEY AREAS

We consider 5 key areas in the business as part of this review. These are:

- Print devices, their usage, location and capabilities.
- Print costs, including maintenance/service and supplies/toner costs.
- Print Management, including reporting tools.
- Device Digitisation, including embedded connectivity, scanning and OCR solutions.
- Digital Transformation, including business workflows, automation tools such as AP Automation and Document Management.

NO INTERRUPTIONS

The review will take place in the background; avoiding slowing you down and allowing you to work as normal. The time required depends on the size and complexity of your environment. The review takes a couple of weeks, but it can take a little longer for more complex environments.

WHAT OUTCOME IS EXPECTED?

Following **Toshiba's PhD** review, we will provide you with a report of our findings and a proposal on how we can help you reduce your costs and improve business productivity. In most cases, our proposal includes:

-  Cutting your ongoing per-page print costs.
-  Reducing and better managing your printing.
-  Improving connectivity to your other systems.
-  Increasing functionality through state of the art Multi-Function devices.
-  Improving sustainability.

EVERYTHING TO GAIN

We provide **Toshiba PhD** as a complimentary service. Following receiving our proposal, you may choose to implement all of it, part of our proposal or none at all. There is no obligation.
